DISPERSAL OF THE MOUNTAIN VIEW ANGUS HERD – ONE OF THE MOST HISTORIC HAPPENINGS IN THE HISTORY OF THE ANGUS BREED

For 77 consecutive years, Mountain View Angus has been a force in the Angus industry. From its very beginning in 1933 until 2010 over a span of four generations, the Mountain View program has maintained a major presence in the livestock industry.

I have just returned from a herd visit to Mountain View, talk about a powerful offering! The females are feminine, very productive, depth of rib, ease of fleshing, the kind that has made the Angus breed – supreme. The bred heifers and the heifer calves are as good as you can find anywhere IN THE WORLD.

Mountain View performance records have been kept and maintained, at the same time they have been used and kept in the selection process. Rest assured this is a genuine working herd of Angus seed stock.

Over the many years Mountain View has campaigned their cattle extensively at the major shows. Time and time again they have proven to be a major factor at the leading shows of the land. Champion after champion, class winner after class winner, these are the genetics that will sell in this dispersal sale.

Mountain View cow families have always been important. One of the most recognizable and famous cow families in the Angus world are the Mountain View Tibbie's, they have done everything and more that you could ask them to do. They are truly in the who's who in the Angus industry. This sale will feature the largest number of them that have ever sold in public auction in the world.

At Mountain View you will find an Angus family – a family farm that's dedicated and devoted to the betterment of the Angus breed. Scott and his wife Orycia carry the banner today and believe me, they are true disciples of the Angus breed.

At Mountain View another important factor has been the production of commercial Angus bulls. Each year they have hosted one of the most successful Angus bull sales in the breed. Keep in mind that the dams, grandams, maternal sisters and family members of these great bulls all sell in this dispersal sale. Scott and his wife Orycia have made the decision to journey another direction in life, thus this complete and total dispersal sale. Never before and maybe never again will such in-depth genetics, predictability and goodness been offered in the livestock world.

As you study the Angus pedigrees you'll be quick to realize that the impact of Mountain View has been world-wide. Mountain View Angus can be found working in prominent Angus herds not only across North America but AROUND THE WORLD.

I can recommend these cattle to the most discriminating. If you're looking for landmark females to take your program to the next level, this sale is a must.

I look forward to seeing my many Angus friends on December 20, 2010.

Sincerely,

Tom Burke
